When you're done, you can use it as a single video or upload it to a channel for the world to see. It's like a game-changer. Branding Let's face it: A company's branding is one of the most important parts of their online presence. It's no good saying "Let's be your go-to agency" if people don't know what you're referring to. I made this easy by giving you a basic identity. With some simple tweaks, you can be your company's face on the web. Photography If you're looking for good photography on the web, look no further. I've used some of the top websites to test out some great ways to showcase your work. While I enjoy taking the photos, some of the best photography in the world is not taken by me. The best in class photos I've ever seen are from the iStock library. The logos can be downloaded for free by going to iStock. Design If you're like me, you spend more time on the production end of things than the design. However, that shouldn't stop you from having a good web presence. Luckily, I've done some of the heavy lifting for you. The most important thing I want you to take away is that you should have a URL for your website. The URL is one of the most important assets on your website and it will make or break the content on your site. The best way to make your site look good is to go to a website like Themeforest. I've picked a website template that looks good and that's what most other people use. It's also simple to use and edit. As you change colors, add graphics, and generally make it your own, the url will change. Change it back when you're done. You can also download a zip file of the template. Simply download it and unzip it. However, you'll need to know how to upload it to your server. I'll provide some helpful advice in my final paragraph. CMS You can use a CMS, Content Management System, but I prefer to use a simple self-hosted WordPress 82157476af
